

Package: tatoo (via r-universe)

September 12, 2024

Type Package

Title Combine and Export Data Frames

Version 1.1.2

Maintainer Stefan Fleck <stefan.b.fleck@gmail.com>

Description Functions to combine data.frames in ways that require additional effort in base R, and to add metadata (id, title, ...) that can be used for printing and xlsx export. The 'Tatoo_report' class is provided as a convenient helper to write several such tables to a workbook, one table per worksheet. Tatoo is built on top of 'openxlsx', but intimate knowledge of that package is not required to use tatoo.

License MIT + file LICENSE

LazyData TRUE

Imports assertthat, magrittr, data.table, openxlsx (>= 4.0.0), stringi, colt, crayon, withr

Suggests testthat, rprojroot, kableExtra, knitr, rmarkdown

RoxygenNote 7.2.3

Roxygen list(markdown = TRUE)

Encoding UTF-8

VignetteBuilder knitr
